Supervised By: Dr. Ali Zolait

ABSTRACT

Freshline is a digital salon booking and grooming platform that improves the traditional salon experience by allowing users to find salons, book appointments, buy grooming products, and receive personalized recommendations, while also helping salon owners manage their business operations through one integrated system. The application was developed using Flutter for the frontend and Supabase for the backend to ensure scalability, reliability, and good performance. User testing showed that the application is easy to use, effective, and received high user satisfaction.

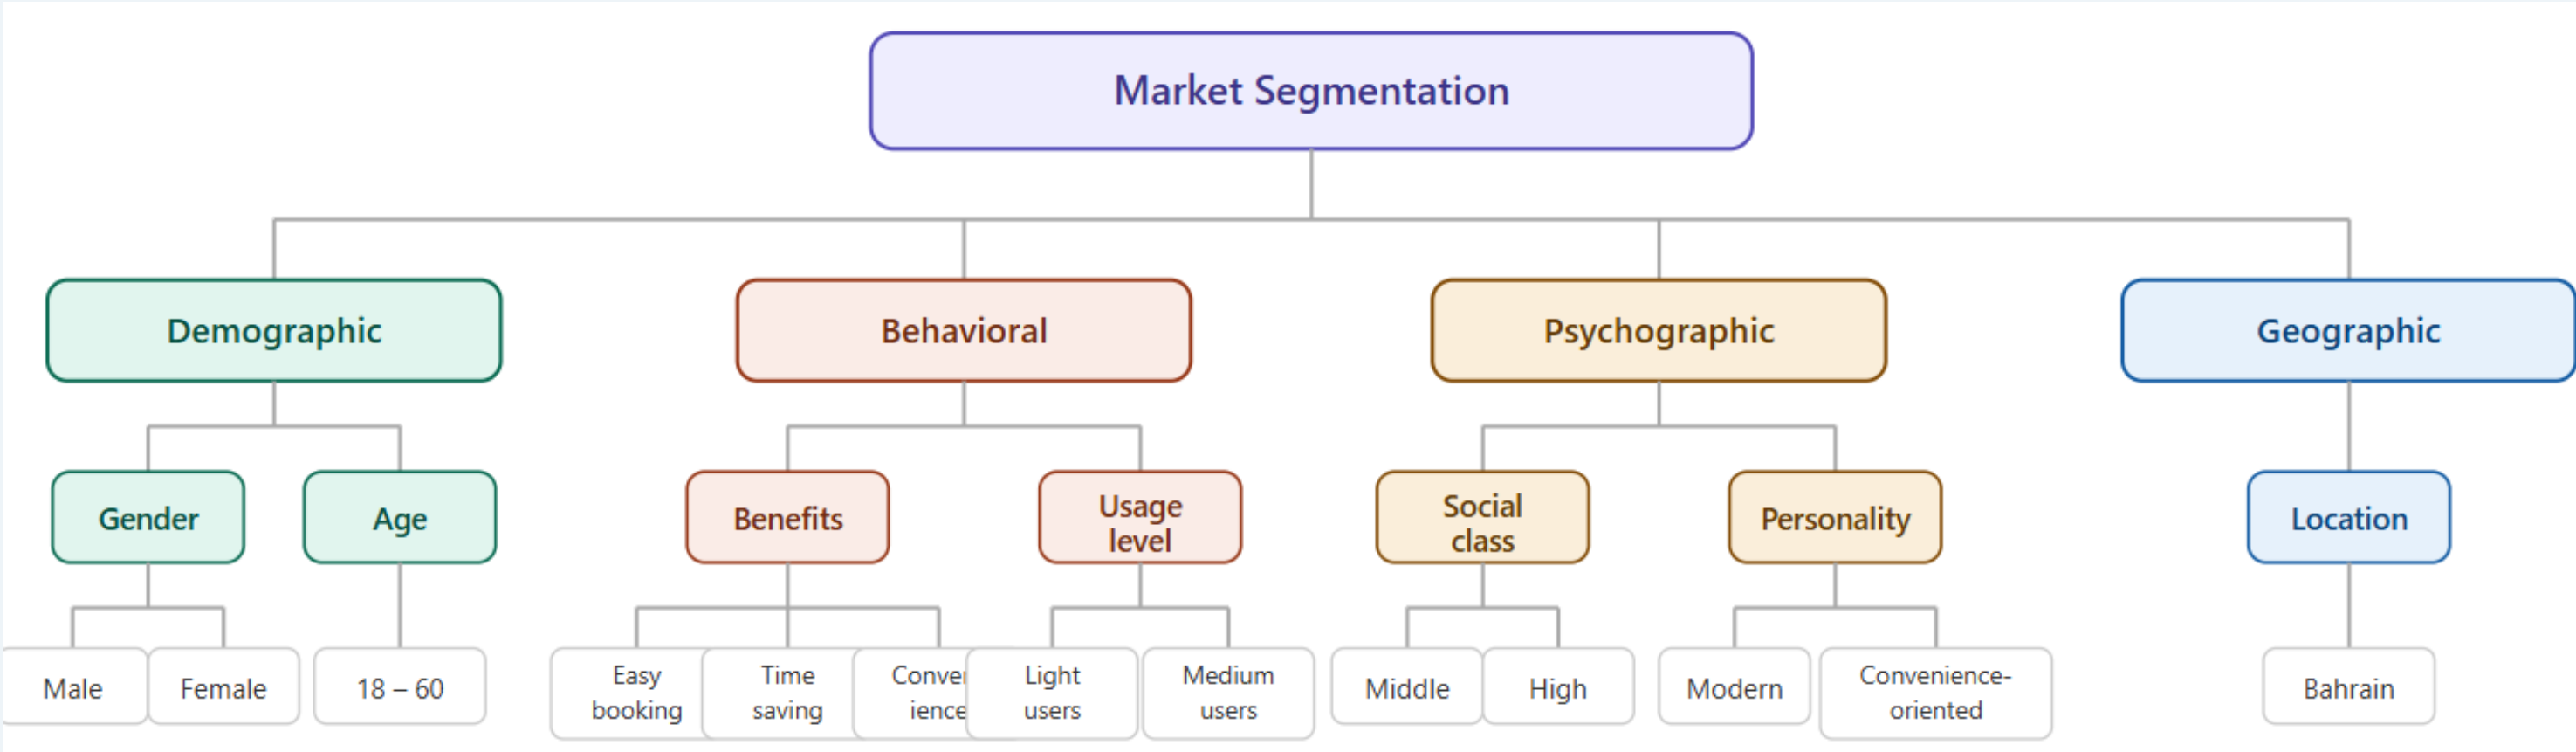

OBJECTIVES

- To improve the salon appointment booking experience for customers in Bahrain through an easy-to-use digital platform.
- To provide users with key features such as salon browsing, appointment booking, grooming product purchasing, and personalized recommendations in one platform.
- To support salon owners in managing their services, employees, appointments, and daily business operations more efficiently.

METHODS/DIAGRAMS/FIGURES

Criteria	Fresha	Booksy	Treatwell	Urban Company	Freshline
Company Profile	Founded in 2015	Founded in 2014	Founded in 2008	Founded in 2014	Founded in 2026

RESULTS

- Freshline successfully provided an all-in-one platform for salon browsing, appointment booking, product purchasing, and AI assistance.
- The system supported different user roles, including customer, salon owner, employee, and admin, which helped manage operations more effectively.
- User testing showed that the application was easy to use, performed well, and gave users a smooth experience.
- The application achieved its main goals by improving the traditional salon booking process and supporting salon owners in managing services, employees, and bookings.

CONCLUSION & FUTURE WORK

Freshline successfully developed a smart salon booking and grooming platform that improves the traditional salon experience. By using Flutter and Supabase, the system became scalable, reliable, and easy to use. The testing results showed that users were satisfied with the application and found it useful for booking appointments, purchasing products, and accessing salon services in one platform.

Future work for Freshline can include adding a virtual try-on feature, improving the AI assistant, and developing a web version of the application. The platform can also be expanded to other GCC countries with more payment options, real-time chat, advanced salon analytics, improved loyalty rewards, and better booking notifications.
